

[Basic Number Screening Test Manual Transmission](#)

INDEX

The subject indexes of all STR volumes are combined in a master index printed in a separate volume. For access to the index volume consult the Army or Navy Agency listed on the reverse of the half-title page.

- Absorbing paint, 122
Acoustic axis, transducer, 21, 35
Acoustic center, transducer, 13, 63
Acoustic impedance, transducer, 12
Acoustic lens, 111
Acoustic materials testing, 100
Acoustic measurements, theory
 see Calibration theory, transducer
Acoustic power of transducer, theory, 14
Acoustic pressure measurement, 58, 60
Acoustic radius, transducer, 31, 155
Acoustic screens, 45
Acoustic tests and equipment
 see Mountain Lakes Test Station;
 Orlando Test Station
Air calibration of transducers, 59
Amplifier circuits, 72, 74, 75, 84, 104,
 106, 118, 119, 124
Automatic volume control circuit, 104
Available power, transducer, 20, 35, 114
- Baffles, acoustic, 44
 bubble screens, 163
 diffraction effects, 157
 transmission loss, 99, 157
Band-pass filter, variable, 137
Barge system, Orlando Test Station,
 133
BDI transducer, symmetry tests, 96
Beat frequency oscillator, 71
Blocked impedance, transducer, 64
Broad-band transducer, calibration, 66
Bubble screens, 163
Bubble-layer paint, 122
Buffer-amplifier circuit, 76
- Calibration computations, transducer,
 138-148
 current charts, 146
 log sheets, 138
 receiving charts, 138
 reciprocity constant charts, 145
 transmitting charts, 143
Calibration equipment, recommenda-
 tions for improvement, 134-137
 absorbing materials, 137
 directivity index measurement, 137
 phase measurement, 136
 pulse recorder, 137
 recording impedance bridge, 137
 transducer response equalizer, 135
 transient analyzer, 136
 variable band-pass filter, 137
- Calibration techniques, transducer
 BDI transducer symmetry, 96
 conversion of air calibrations, 59
 coupling, 94
 directivity pattern, 95, 97, 150
 impedance, 64, 97, 150
 low frequency calibrations, 115-119
 motional impedance method, 64
 noise, 94
 proximity corrections, 52-58
 reciprocity method, 98
 reflection effects, 40-50, 150
 response, 94, 97
 sound-pressure measurements, 58, 60
 standard transducers, 65
 testing site requirements, 37-40
 use of acoustic tanks, 40, 109, 120, 150,
 151
 wide-band calibration, 66
Calibration theory, transducer, 18-37
 directivity, 21-26, 35
 projector efficiency, 26
 receiving response, 27, 35
 relations between characteristics, 31-
 33
 selectivity, 27
 threshold pressure, 28-30
 transmitting response, 20, 35
Capacitance bridge, high frequency, 126
Charts for transducer calibration, 138-
 146
Circuits, electronic
 amplifier, 72, 74, 75, 84, 104, 106, 118,
 119, 124
 AVC, 104
 detector, 76, 106
 filters, 84
 gating, 81
 impedance bridge, 125
 modulator, 82
 noise generator, 107
 phase bridge, 136
 power supply, 107
 pulse rectifier, 81
 recorder, 78
 signal generator, 71, 81, 104, 127
 transducer coupling, 74, 105, 124
 transmission measuring, 84
Computations for transducer calibra-
 tion, 138-148
Condenser-type hydrophone, 60
Converter circuit, 77
Coupling, theory of transducer, 11
 Coupling circuits, transducer, 74, 105,
 124
 Coupling constant, transducer, 11, 14
 Crest factor, acoustic wave, 67, 101
 Crystal filter, 76
 Crystal transducer, charge on, 28
 Current charts, transducer calibration,
 146
- Detector circuits, 76, 106
Diaphragm motion, theory, 16
Diffraction around baffles, 157
Dipole source, directive pattern, 41
Directional sources used in transducer
 calibration, 41
Directivity factor, transducer, 15
Directivity index, transducer
 computation from patterns, 21, 64,
 144
 desirability for high directivity, 9
 direct measuring device, 137
Directivity patterns, theory, 7, 41
Directivity patterns, theory of measure-
 ment, 21, 35
Dome design, transducer, 153-156
Dome tests, transducer, 99
- Echo-ranging system tests in lakes, 103
Effective area, transducer, 16, 31
Efficiency, theory of transducer, 14, 26
Electrical impedance, effective trans-
 ducer, 11
Electroacoustic transducer theory, 10-17
Electromechanical transducer theory, 10
Electronic switch, 127
Equipment, acoustic test
 see Mountain Lakes Test Station;
 Orlando Test Station
Equivalent circuit for transducer, 27
- Filters, crystal, 76
Filters, electrical, 84, 137
Focussing in acoustic tanks, 111
Formulas
 acoustic pressure-gradient, 52
 baffle transmission loss, 157
 connections between transducer char-
 acteristics, 31-33
 diffraction, circular baffle, 157
 directivity patterns, 53
 dome reflection coefficient, 155
 dome transmission loss, 154
 interference pattern, 40, 50
