This is a cool way to compartmentalize your arrangement and remove clutter as this also lets you put MIDI patterns into it.. The best thing about free music production software is that it lets you try out something new and learn the basics without investing a ton of money into something you may not really enjoy.. This is what the piano roll (or MIDI editor) looks like in LMMS It's pretty clean and easy to use, and has a great feature that lets you write any chord.. Essentially, it's a host for plugins you download such as virtual instruments and audio effects, not to mention all the audio recording, editing, and arranging you will do.. it doesn't use much CPU either but, it is a very basic Digital Audio Workstation.
